

Memorandum

TO : Chief, ASD
cc :
FROM : DAD/S&D

DATE: 17 November 1964

SUBJECT: Comments on the attached Memorandum for the Record

1. Refer to paragraph 7: Is something missing in the first sentence?

2. Refer to paragraph 10: I get the impression that everybody at feels that is not working as hard as anybody else. Do we concur in this or do we sort of line up with here?

3. It isn't clear to me what operation of the radar system will contribute to the O program. We may end up knowing quite a bit about what we have put together, but does this really tell us very much that we do not already know about the actual equipment against which the O may have to fly? The cross section measurements by should supply the basic data on which detection can be calculated using basic numbers that represent the best estimate what the SR radar really is. I am concerned that operation of the may create more false impressions and false information in this area than it will true information.

4. Refer to paragraph 5: has been kind in saying that the radar is a marginal piece of equipment. It is the junkiest piece of equipment I have ever seen in my life.
